#### 11/22/63 by Stephen King

In this novel about a man going back in time to stop the assassination of JFK, readers must be willing to accept the concept of time travel. Jake Epping, a high school teacher in Lisbon Falls, Maine, learns from his friend that his burger joint's pantry is a time-travel portal to the past - to five years before Oswald shot Kennedy. The thrill of this novel is that Jake has to live in the past for five years and keep tabs on Oswald. It's during those years that this historical fiction, so seamlessly blended with science fiction, transforms into an endearing love story. Readers will be reminded of the suspenseful tension of King's eerie stories, but **11/22/63** is no nightmare. It's not typical Stephen King - it's a creative Stephen King. Some might have to accept the challenge to read an 849-page book, but it's recommended in this case. Believe it or not, you're finished before you know it!
